Lab 1: Introduction to Cisco Lab

Institution Legal Name: UNITEN Academy

Cisco Networking Academy is an IT skills and career building program for learning institutions and individuals worldwide. The Networking Academy curriculum is delivered online using a proprietary learning platform in partnership with local learning institutions. Cisco provides the curriculum, learning platform, and support resources. An engaging, up-to-date curriculum created by experts in technology and instructional design

Cisco courses help students develop technical mastery and build critical thinking and problem-solving skills needed to succeed.

Local learning institutions hire instructors, provide equipment, and enroll students.

Every students are required to register with the academy to be enrolled by the instructor. All enrolled students are eligible for all learning resources provided by the academy which includes:
- Hands-on labs and online activities for the practical application of learned skills
- Cisco Packet Tracer, a network configuration simulation tool, used for teaching, gaming, and team building
- Instructor guides, community forums, and professional development support instructors
- Innovative online assessments include embedded activities, simulations, text questions, and performance-based reviews
